The Management of Choo Chiang has established a Sustainability Council and a Sustainability Working Group, which works under the guidance of the Board to ensure that sustainability measures are implemented across the business. The Sustainability Council will measure and review progress towards our sustainability goals and engage accountable stakeholders to ensure targets are met.

FY2021 was a resilient year for Choo Chiang despite the economic impact and uncertainty arising from the long-drawn Covid-19 situation in Singapore. With high vaccination rates and green shoots of economic recovery, coupled with a resilient business model, we are optimistic that the crisis has made the Group stronger and will help us to thrive and tap on new opportunities in the months and years ahead.

As we continue to navigate the challenges of the Covid-19 pandemic in FY2021, the Board has, in its review of the Group's operations, believes that Occupational Health and Safety of our employees continues to be the key factor in ensuring the continued growth and sustainability of our operations. We continue to take steps to communicate with our staff and connect them with resources that support their health and well-being. We continue to actively address evolving issues and provide guidance to our staff consistent with local government regulations. Social distancing measures at the workplace, staggered work hours, mandatory mask wearing, team segregation of work and telecommuting are some of the measures we have put in place to keep our employees safe.

No staff was retrenched arising from the impact of Covid-19. We did not practice pay-cut or no-pay leave, regardless of various work modes. Our staff provided feedback that they viewed employment with Choo Chiang as a steady rice bowl in very uncertain times.

ECONOMIC

By incorporating sustainability measures and corporate social responsibility values in our business strategies, this has allowed us to enhance our stakeholders' value and higher positive returns. Amid the challenging environment, we have multiplied our growth and we are committed on an ongoing basis to improve the Group's sustainability. Looking forward, we believe this would lead the Group towards positive growth.

ENVIRONMENT

Reducing the impacts that we have on the environment has been an important part of how we run our business for many years. We have proven that this approach brings lasting, mutual benefits to our business and in the world that we live in. During the year, we have worked with waste contractors on our long-term no-waste ambition. Besides reducing the impact on the natural environment through efficient waste management, and recycling disposable items such as copper and paper, we have also raised employee awareness on critical issues in sustainable development through relevant initiatives.

SOCIAL

In order to ensure the long-term success of the business, the Management recognises the importance of attracting, retaining and developing a high-quality workforce. Hence, we have invested in employee trainings to promote professional and personal development for employees as well as rewarding those who uphold our values within the organisation.

Looking ahead, we hope to further improve our sustainability tracking through a target-based approach with clear and measurable metrics. In this Report, you will be provided with a balanced view of our position and performance with regards to some key issues and added-value measurements.

OCCUPATIONAL HEALTH AND SAFETY

Being one of the leading distributors of electrical products and equipment, our operation exposes the local community to road traffic safety risks across our supply chain from purchasing of inputs to delivering of outputs. At Choo Chiang, we aim to keep the accidents at bay and ensure our drivers return home safely at the end of each day. However, it is extremely important to mitigate these risks for the betterment of the employees as well as the Company.

By issuing the policy, the safety vision is reinforced to the employees who further take extra care when commuting from one place to another while distributing the goods.
